AI & media

Integraciones IA · Modelos generativos · Automatizaciones · Edición de video

Tooling

TypeScript · Vitest · Playwright · CI/CD · Supabase CLI

JUAN IGNACIO DÍAZ

FULL STACK DEVELOPER

PROFILE

With more than 3 years of experience in web development, I specialize in creating digital solutions that combine elegant design with robust functionality.

My approach focuses on building products that not only look good, but also offer an exceptional experience and measurable results for users and business.

EXPERIENCE

FULL STACK DEVELOPER · FREELANCE / INDEPENDENT

2020 — Present

My approach has always been focused on creating efficient, intuitive solutions adapted to the real needs of users. Each project was another step in my professional growth, combining design, logic, architecture, and user experience.

Complete web platforms · Management systems · QR generators · Process automation · API integrations · Modern and optimized front-end applications

2020

First steps

I started exploring programming from scratch. With HTML and CSS I built small interfaces and simple games that taught me the basics of web design and page structure.

PLATZI

Web development and database courses

Courses that helped me consolidate my technical foundations.

UNIVERSIDAD CERVANTES

Associate degree in Web Development and Digital Applications

I deepened my academic training in web development and digital applications.

SELF-TAUGHT

More complex, scalable products

I kept growing on my own, adding JavaScript, React and Next.js to build more complex and scalable products.

TODAY

Continuous improvement

I keep training and building increasingly complete tools, up to date with the most widely used technologies in the JavaScript ecosystem.

JUAN IGNACIO DÍAZ

FULL STACK DEVELOPER

FEATURED PROJECTS

RIVERAS DEL SUQUÍA · MANAGEMENT SYSTEM

-70%

monthly operational load by automating reports and approvals

Cooperative ERP that centralizes collections, logistics, inventory and real-time indicators for the Riveras del Suquía cooperative.

Next.js | Node.js | PostgreSQL | Supabase | Tailwind

Private project

RIVERAS DEL SUQUÍA · WEB PLATFORM

x5

organic visits thanks to SEO and manageable content

Institutional website for the Riveras del Suquía cooperative, with services, a gallery of work, a location map and a contact form.

HTML | CSS | JavaScript | Bootstrap | jQuery

riverasdelsuquia.com.ar

VIVEROS UNIDOS · WEB PLATFORM

+45%

B2B sales with online orders, tracking and alerts

Institutional website for the Viveros Unidos cooperative: about us, substrate production, training and an invitation to join the network.

HTML | CSS | JavaScript | Bootstrap | jQuery

viverosunidos.com

VIVEROS UNIDOS · MANAGEMENT SYSTEM

-30%

logistics coordination time, with full batch traceability

Stock, production and distribution control with customized dashboards and notifications for associated nurseries.

Next.js | Node.js | MongoDB | Supabase | tRPC

Private project

COOPYME · COOPERATIVE PLATFORM

150+

self-managed members with dashboards and automations

Institutional website for Coopyme, which promotes collaborative work networks between small and medium businesses and cooperatives, with goals and a contact form.

HTML | CSS | JavaScript | Bootstrap

coopyme.org
